

Task 1

Installation of Cisco Packet tracer

Step 1: Visit the official website of [Netacad](https://www.netacad.com) using any web browser.

Step 2: Press the login button and select log In option.

Step 3: Next screen will appear, click on the sign-up option.

Step 4: Now the login screen appears again so fill in the Email id.

Step 5: On the next screen enter the password and press the Login button.

Step 6: Dashboard will initialize, now click on Resources and choose Download Packet Tracer Option.

Step 7: On the next web page choose the operating system to download the packet tracer. Downloading will start automatically.

Step 8: Check for the executable file in your system and run it.

Step 9: Choose the installing location which has sufficient space.

Step 10: Select the start menu folder and click the **Next** button.

Step 11: Check the box for creating a desktop icon and click on the **Next** button.

Step 12: Now packet tracer is ready to install so click on the **Install** button.

Step 13: The installation process will start and will hardly take a minute. Click on the **Finish** button to complete the installation.

Step 14: An icon is created on the desktop so run it. Interface is initialized and the software is ready to use.
